

The Kiwanis Pediatric Emergency Medicine Fellowship Program, a.k.a, the “Kiwanis Doctor”

- Provides for the training of a doctor in Pediatric Emergency Medicine over a two-year period.
- The Kiwanis Pediatric Emergency medicine Fellowship provides the funding for “Kiwanis Doctors” to train physicians in the specialty field of Pediatric Emergency Medicine.
- Since 2004, the Kiwanis Cal-Nev-Ha Foundation has pledged \$590,000 to provide for a doctor to be trained in a pediatric emergency medicine.

What is the goal of this program?

To save the life of **EVERY** child.

Kiwanis doctor

**The first Kiwanis
Doctor
Andrea Thorp,
MD, FAAP**

Dr. Thorp completed the Kiwanis Doctor Program in 2007. She currently serves as the Assistant Program Director for the pediatric emergency medicine fellowship at Loma Linda University. She is directing the medical aspects of the Kiwanis Doctor Program, continuing to lead seminars throughout our District and looks forward to mentoring the next generation of pediatric emergency physicians.

**The second
Kiwanis Doctor
Tim Young, MD**

Dr. Young attended Loma Linda University School of Medicine after graduating from the University of California, Irvine. His training is in emergency medicine, and he will begin training in Pediatric Emergency Medicine at Loma Linda University Medical Center and Children's Hospital. While in college, Young volunteered at a local medical center in the pediatric ward. He also organized a week-long summer camp for children ages 5-13 from homeless and economically disadvantage families.

**The third Kiwanis
Doctor
Sarah Christian-
Kopp, MD**

Dr. Kopp attended Medical School at Loma Linda University and is currently finishing her emergency medicine residency in Arizona. Dr. Kopp has a strong knowledge base in emergency medicine and will bring a new level of enthusiasm and energy to the program.

Trained to become experts in:

- Complications from chronic illnesses.
- Fractures, head injuries, burns, and injuries from car accidents.
- Severe infections, high fevers, allergic reactions, seizures.
- Poisoning and overdoses.
